SUMMARY

I specialize in both backend and frontend development, with extensive experience in Java-based frameworks such as Quarkus and Spring Boot. I am proficient in using technologies including GraalVM, Mutiny, JPA, Spring Data, Docker, Kubernetes, AWS, gRPC, REST APIs, MySQL, MongoDB, PostgreSQL, Redis, GraphQL, and Kafka, adapting to the specific needs of each project. My focus is on delivering scalable, high-quality solutions while ensuring seamless integration across the stack. I have briefly worked with Next.js and Angular, contributing to multiple projects.

WORK EXPERIENCE

Software Developer | Türkiye'nin Otomobili Girişim Grubu TOGG | Türkiye | Dec 2022 -

- Backend development with Java Quarkus & Spring Boot
- Microservice implementation with gRPC & REST APIs
- Development with Angular & Next.js for frontend projects
- Proficiency in technologies like GraalVM, Mutiny, JPA, Spring Data, Docker, Kubernetes, AWS, MySQL, MongoDB, PostgreSQL, Redis, GraphQL, and Kafka
- Focus on scalable, high-quality solutions with seamless integration across the stack

KEY SKILLS

- | | | |
|----------------------|--------------|--------------|
| • Java | • JPA | |
| • Quarkus | • GraalVM | |
| • gRPC | • Mutiny | • MySQL |
| • Spring Boot | • GraphQL | • PostgreSQL |
| • REST Api | • Docker | • MongoDB |
| • Spring Data | • Kubernetes | • Redis |
| • Angular | • AWS | • Kafka |
| • Next.js | | |

EDUCATION

Ondokuz Mayıs University, Türkiye |
Electrical and Electronics Engineering, BSc
*2.7/4
